

1 **51053/JEC/B600 -**

WHAT IS CLAIMED IS:

- 5 1. A method in a mobile set for selecting data to be stored, comprising:
 (a) displaying a plurality of recording modes; and
 (b) indicating a selection means for choosing a recording mode.
- 10 2. The method of claim 1, further comprising step (c) providing a
confirmation signal after a selection means for choosing a recording mode has
been selected.
- 15 3. A method in a mobile set for replaying recorded conversations, comprising:
 (a) displaying a line indicating a data structure of recorded
conversations; and
 (b) in response to selection of the displayed line, replaying a recorded
20 conversation.
4. A method in a mobile set, for replaying previously recorded conversations
during a real time conversation, comprising:
 (a) displaying a list of data structures representing recorded
25 conversations; and
 (b) in response to selection of the displayed list, replaying at least a
portion of a data structure.
- 30 5. The method of claim 4, wherein the displaying of a list of data structures
can be accessed during a real time subscriber conversation using the mobile set
without interfering in the communication between the subscriber and a base
station.
- 35
